

Readopt with amendment Env-Wq 1106.02, eff. 5-1-14 (doc. #10577), to read as follows:

Env-Wq 1106.02 Materials and Methods of Construction for Pools.

- (a) The floor and walls of a pool shall be fabricated using a material that is uniform, inert, non-toxic, impervious, and corrosion-resistant, such as poured or pre-formed concrete, concrete blocks, stainless steel, or fiberglass.
- (b) The pool floor shall have a non-slip finish.
- (c) A pool may be lined, provided the liner is a uniform, inert, non-toxic, impervious material with a non-slip finish.
- (d) Subject to (e), below, the floor and walls of the pool below the water line shall be white or a light color having a value of 6.5 or higher on the Munsell color value scale such that an individual standing on the pool deck can identify a bather on the pool bottom, cracks in the surface finish of the pool, and algae growth, debris, or dirt within the pool.
- (e) The following components may have a Munsell color value of less than 6.5:
 - (1) Lane markings;
 - (2) Dedicated competitive diving well floors;
 - (3) Step or bench edge markings;
 - (4) Water line tiles; and
 - (6) Depth change indicator tiles.
- (f) Each component of a pool, including all components of the circulation system, shall be installed in accordance with its manufacturer's specifications.
